Customer Service

If you have questions or just need some clarification concerning what parts to order, please call our customer service department at (317) 462-3124 and someone will assist you. You may also place your order using this number.
You can also place your order using our website www.studebaker-intl.com.

Telephone Ordering

Our sales personnel process a large volume of telephone orders on a daily basis and we recommend the following procedures to save time.
1.) Prior to calling, write out a list of the parts you wish to order including the part number and a short description.
We recommend using our Order Form on the next page of this catalog. An online order form can be downloaded and printed from our website. The file is located within the "Catalog" page. Just click on the "Order Form" link to download the file. The blanks represent the information we'll need to complete your order over the telephone. Part numbers are always preferred for accuracy. We have found those customers who take the time to make this list before they call require less valuable telephone time and make more accurate purchases.
2.) Returning customers please have your customer order number ready. It is printed on the back cover of this catalog on the address label.
3.) Call (317) 462-3124
Give the part numbers for the items you wish to purchase and the short description you've prepared ahead of time. You will be asked for your customer number and the method of payment you wish to use to complete the transaction.
4.) Shipping
Shipping and handling fees are added to all orders as well as state tax for Indiana residents. You may request special handling of your order at this time.
Refer to the following shipping options to choose your preference.
If choosing no preference, we will send your purchase on the most economical basis available upon the time purchase.
5.) Save your list and use it to verify your parts when they arrive against the invoice and contact us if there are discrepancies.

Please Note: Parts ordered by description only are subject to interpretation and may be incorrect. Parts are returnable for exchange excluding shipping or return shipping fees.

Ordering Suggestion

1.) When placing an order or speaking with one of our customer service representatives, please take note of their name. This way if you should need to speak with them again you will know who to ask for.
2.) Pay attention to quantity markers in our Catalog. If an item is listed as a "pr." and you order 2, you will receive 2 pair. If an item is listed as "ea." and you do not specify the quantity you want, you will receive 1 item.

Ordering by Mail

Use the enclosed order form and complete all information including your name and address, customer number, item numbers and a short description of what you want to order. You may pay by credit card or by check.
Certified checks are not held for clearing, but personal and company checks are held 10 days. All checks must be drawn from a US bank.
Those sending checks need to add an additional $10.00 for parts totaling $100.00 or less, 10% of total on orders of $100.01 to $250.00 or 5% of total on orders over $250.00 to defer some of the shipping charges.

This is an estimation of actual shipping cost and discrepancies in fees paid will be returned or charged accordingly. Indiana residents add state sales tax.
This is for check purchases only. Credit card and telephone orders are charged actual shipping fees when invoiced.

Our Fax Number Is

Our e-mail address for orders and information is: jim@studebaker-intl.com
We'll usually respond by e-mail the next working day.

Ordering from Canada

Only credit card payment is available for Canadian orders. No money orders or checks accepted.
Follow the same procedures listed before when ordering.
Shipping: All parcels are sent by airmail unless customer requests otherwise.

Ordering from Overseas

Only credit card payment is available for overseas orders. No money orders or checks accepted.
Follow the same procedures listed before when ordering.

Shipping -All parcels are sent by Airmail. U.P.S service is also available upon request to most overseas locations. U.P.S "Expedited" service provides delivery within approximately 5 working days. For faster service U.P.S. "Express" Service provides delivery to most overseas location within 3 working days. Delivery time depends upon the country.
If you have questions or just need some clarification concerning what parts to order, please call our customer service department at (317) 462-3124 and someone will assist you. You may also place your order using this number.

Domestic Shipping and Handling Fees

Shipping and handling fees include charges for shipping, boxes and packaging as well as any other costs in preparing items for shipment. Smaller items are usually sent priority mail, larger boxes by U.P.S.
U.P.S. charges are determined by weight as well as distance. Items requiring separate packages or special handling in preparation for shipment are assessed accordingly. Shipping charges for back ordered items are charged when the item is sent. Some large or heavy items require freight carriers. Our sales personnel can only estimate the cost of shipping an order. Charges for shipping & handling are always kept at a minimum and are not refundable.

Second Day Air Service

For faster delivery you may request this service. Delivery is guaranteed by U.P.S. within two working days from the day shipped. This means that you can place an order with us on Monday and have the parts on Wednesday. An additional shipping charge applies to Second Day Air service which is based upon the weight and distance.

Third Day Air Service

For U.P.S. deliveries within 3 days you may specify this service. Order by Monday and you will receive it on Thursday. An additional shipping charge applies to U.P.S. Third-Day Air which is based upon the weight of the items shipped.

Note: Aerosol paint cans cannot be shipped by air.

Next Day Air Service

For next day delivery you may request this service. Delivery is guaranteed by U.P.S. the next working day after being shipped. Saturday delivery is also available for an extra charge. An additional shipping charge applies to Next Day Air service which is based upon the weight of the items shipped.

Exchanges & Refunds

We want to process your exchanges and refunds quickly and efficiently. You must include a copy of your invoice and a note of explanation in the same box with the items you are returning. Electrical and custom made items are not returnable.

All returns need to be sent to our Hope store at:
111 Aiken Street Hope, IN 47246.

There is a $5.00 “Invoice Search” fee (per invoice) for items returned with no invoice. Also, items returned after 30 days from the date of purchase without an invoice are assessed a 20% return fee. Items returned with an invoice within 30 days of purchase are not assessed a return fee.

Please enclose a note of explanation for the return along with the invoice. This note of explanation must be included even if you have previously discussed the problem with a customer service representative. If you believe an item is defective, please give a detailed explanation of the problem.

Do not fax or phone this information to us. It must be in the returned box.

State if the item is to be exchanged for another item, a refund is to be issued or a credit applied to your account.

Carefully repackage the item and return it to us with adequate insurance. Mark the carton “RETURN” near the address label. It is your responsibility to return items safely. Refunds will not be made for articles damaged during return shipment. Articles may be exchanged or returned for a refund up to 30 days from the date of purchase with no restocking fee.
All returned items including packaging must be received by us in the **Same condition as when shipped for full credit. Items returned after 30 days are subject to a 20% return fee. Shipping charges are not refundable. Absolutely no returns or exchanges after 1 year from the date of purchase.**

Please Note: Return shipping charges are nonrefundable for items ordered without part numbers.

Back Ordered and No Stock Items

Items marked on your invoice as “Back Ordered” (B/O) are currently not in stock but are expected. These items will automatically be sent to you when available. After 30 days you will be called to verify that you still wish to order. Items marked “No Stock” are not currently available and there is no expectation of their availability.

Damaged Articles

All items are insured against damage in shipment. Notify us and we will submit a claim and replace your order.

Do not return damaged items to us unless you are instructed to do so.

Electrical Parts Returns

Because improper installation can damage electrical parts, some parts are nonreturnable. Please call and check before returning.

Kit Returns

Substitutions or deletions are not allowed for kits. Likewise, if items are returned from kits the special kit price will be changed to the “Total of parts priced separately” amount. In other words, you may actually pay more by returning parts. Please review contents of kits carefully before ordering as you will only receive the special kit price if all kit contents are kept.

Missing Articles

Check contents of box right away to make certain that everything you ordered and paid for (per the invoice) are enclosed. All orders are checked and rechecked prior to shipping. Report any exceptions to us within 10 days of receiving your package by e-mail or phone (317) 462-3124. It is your responsibility to check your order for shortages within this 10 day period. No adjustments will be made after 10 days. Use your customer number and invoice as a reference.

Oops - I Forgot Something!

We are always glad to place a second order or even add onto an order for you. We don't always have time to locate your prior order and slip the part in to save you from additional shipping charges. No matter how small the added item or items may be, please expect additional shipping charges.

Core Charges

Certain items listed as "exchange" require a refundable core charge in addition to the cost of the part. This core charge is listed on a separate shipping invoice. To receive your refund, please return your old core with a copy of your invoice. Because of a shortage of cores, some items in the catalog require that the core be sent to us first. No refunds for cores will be issued without a copy of the core invoice within the returned box. Cores received without an invoice will be held for 10 days and then will be considered a gift.

Please do not return cores to us at swap meets or car shows. Cores must be returned intact. Disassembled cores are not acceptable.

Warranty

All new and reproduction parts are guaranteed against defects in workmanship and material for 30 days from the date of purchase. Items not used by the customer or not installed until a later date have no special warranty and are not under warranty past the original 30 days from the date of purchase. Liability of Studebaker International is limited to the replacement of defective parts only and is not liable for any damages to property, loss of time, loss of profits, or any other incidental damages arising from the purchase or use of items purchased. The buyer assumes all risks or losses associated with parts purchased from Studebaker International. Although we make every effort to make the...

...information in this catalog correct, use your Studebaker chassis and body manuals for the exact information and application regarding your vehicle.

Hours

Our Studebaker International Stores are open Monday - Friday from 8 a.m. to 5 p.m. Saturday 9 a.m. - 1 p.m., Eastern Standard Time. Our telephone ordering lines are open Monday through Friday 8-6, Saturday 9 a.m. - 1 p.m. (EST).

Prices

As collectors and hobbyists, we at Studebaker International are concerned about rising prices and do our best to keep prices as low as possible. Unfortunately, we can not always avoid increases and therefore cannot be responsible for price changes after this catalog is published. If an ordered item has increased significantly from the listed price we will notify you prior to shipping. If the increase is slight we will go ahead and include it with your order without prior notification.

Discounts

We appreciate customers making large purchases and offer the following special discounts:

Purchase total over:

$500.00	10% discount.
$1,000.00	15% discount.

Discount applies to a one time only single purchase and is not cumulative or applicable to future orders. Total is for parts only and does not include core charges, shipping and handling fees or any state tax. Part numbers must be furnished when order is placed and discount does not apply to orders requiring special handling. Returned parts bringing the total to less than the required total will void the discount. Discount does not apply to special order items or certain N.O.S. parts. We reserve the right to withdraw this offer at any time.

Restorer's Discount Package

Are you restoring your vehicle and want to take advantage of our volume discounts but you're not sure what parts you will need until the tear-down begins?...Keep reading...

This is how it works; you pay a minimum deposit of $2,500.00 or more to open your package. You can then place ANY SIZE parts or novelty item order you wish and receive a 15% discount {see discount *exceptions} on your order. You can also use it on pre-orders for delivery to swap meets that we attend to save on shipping.

The package stays open until you use up the funds. You can take as long as you need because there is no time limit! You may add to your package in increments of $1,000.00 or more if you are running out of funds before you are finished with your restoration. You must do so before your funds are used up. We will send a statement with your orders showing your available balance.

Restorer Package customers are required to provide part numbers when ordering, so it is strongly suggested that one of your first purchases might be for body & chassis books if you don't already have them.

Any unused balance is non-refundable, however, you may transfer your balance to another person; such as someone purchasing your vehicle.

Returns will be credited back to your Restorer Pkg. account less the 15% discount. Returns received after your package is closed will be refunded in the form of a "store credit" less the 15% discount.

Discount *exceptions: Rare parts, core charges, shipping/handling, shop/service charges, Avanti seat covers, tires, sales tax.

We reserve the right to withdraw this offer at any time.

Join The Club!

It is recommendation that all Studebaker, Avanti and antique car owners be members of a related club.

Studebaker Drivers Club

It is our recommendation that all Studebaker owners be members of the Studebaker Drivers Club. This organization publishes a monthly magazine that is loaded with historical information, technical tips, meet locations and reports, and hundreds of classified ads for vehicles, parts and literature. In addition, local chapters exist throughout the U.S. which provide information for obtaining parts and technical information as well as a camaraderie with others sharing a similar interest.

Contact: Membership Director S.D.C., Box 1743, Maple Grove, MN 55311-6743 or Call (763) 420-7829

Avanti Owners Association

We also advise Avanti owners to join the Avanti owners Association. The advantages for Avanti owners are the same as those enjoyed by members of the Studebaker Drivers Club - Information, parts, and camaraderie. This organization publishes a quality quarterly magazine that provides Avanti owners with invaluable information.

Contact: Membership Director A.O.A.I., Box 1743, Maple Grove, MN 55311-6743 or Call (763) 420-7829

Antique Studebaker Club

Owners of Studebaker built through 1946 and M-series trucks are advised to join the Antique Studebakers Club. They publish a magazines six times a year that contains information on the history, maintenance, and restoration of the earlier cars, as well as ads for cars and parts.

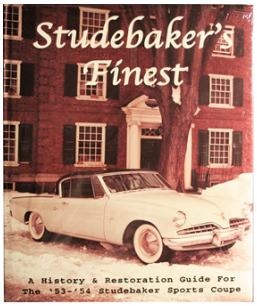
Books

STUDEBAKER'S FINEST BY JOHN BRIDGES



800052 A history and restoration guide for the 1953-54 Studebaker Sports Coupe. Follows the development and design of the 1953 Studebaker with many factory photos from styling proposals to the finished design. This book contains much historical information from designer Bob Bourke to all aspects of the design of the 1953-1954 models. A section on manufacturing of the cars contains lots of factory photos of the production line and history of the production problems that plagued the new model. Production figures are included for Champion & Commander models as well as coupes & sedans for both 1953 & 1954 car. Another section covers how the new 1953-54 models were promoted around the world. Many factory publicity photos are included. There is also a listing of the 18 awards the new design received. This book contains much detailed information with photos concerning emblems, trim, upholstery, accessories, colors etc, that is very useful when restoring one of these vehicles. Changes in the 1954 model are detailed which is also documented with lots of pictures. Specifications and I.D. number locations are listed as well. A section covering 1955 models as well as 1956-64 Hawks is also included. High performance models are included with a special listing of Bonneville records set by 1953 or 1954 coupes. A final section contains restoration basics for these cars with a lot of critical information for anyone restoring or considering restoring one of these cars. It's unfortunate that there isn't a book like this for every year & model of Studebaker. However, this book contains information of interest for all Studebaker enthusiasts, and restorers of other Studebaker models.

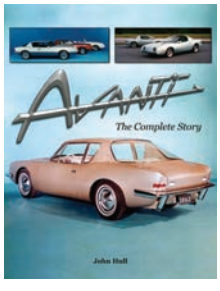
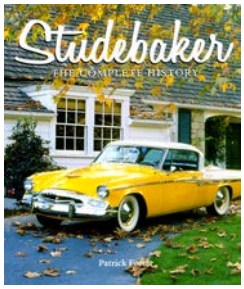
AVANTI: THE COMPLETE STORY BY JOHN HULL



801846
Avanti is Italian for "forward" or "advance" & the car lived up to its name. This book tells the amazing story from the Avanti inception in South Bend, Indiana, to its current status in Cancun, Mexico. Many original source documents, factory photographs, corporate records, advertisements, and first hand accounts trace the evolution of this American classic. The Avanti design...

...was conceived by one of the greatest industrial designers - Raymond Loewy & his associates for Studebaker. The Avanti was Studebaker's shining star for a brief period of time (1963-1964 model years) before the company exited the automobile manufacturing business in the United States in December of 1963. The Avanti exhibited phoenix like traits a number of times since & has gone through more than a handful of owners along with updates in design, maintaining a loyal customer base large enough to support production as a luxury specialty car, on & off for more than 45 years. Get the full scoop from an Avanti insider on the companies and people who helped keep Avanti alive. **....$39.95 ea.**

STUDEBAKER: THE COMPLETE HISTORY BY PATRICK FOSTER



801849
Studebaker; The Complete History tells the full and fabulously colorful history of this icon of the American automotive scene. Rife with triumph and tragedy, brilliant moves and boneheaded decisions, Studebakers decades of building cars makes for a tempestuous saga featuring some of the more interesting characters in the twentieth century business world. But, above all, the story features cars that, for countless Americans, truly defined driving; not just the Champion, which rocketed the company back to the top in 1939, or the 1950s Raymond Loewy-designed Starliner, deemed a "work of art" by the Museum of Modern Art, but also the Hawks and Larks that so many driver's loved. As the book traces Studebakers fortunes from success to crisis to merger and back, it also dwells with loving photographic attention on the vehicles, from the first electric car to the last Avanti. **.....$39.95 ea.**

OVER A CENTURY ON WHEELS BY ANDREW BECKMAN, ARCHIVIST, STUDEBAKER NATIONAL MUSEUM

802128 From its humble beginnings as a two-man blacksmith shop, Studebaker grew to become the nations largest...

...manufacturer of wagons and buggies. As the nation's tastes shifted to automobiles, Studebaker did so as well, & was the only horse-drawn manufacturer to successfully transition to self-propelled vehicles. A strong sense of history resonated throughout the company. In 1927, the Studebaker Corporation celebrated its seventy-fifth anniversary while its competitors were still in the teens. Fathers & sons worked side by side, & three generations of Studebaker employees was not uncommon. Employee paychecks were signed by company founder Henry Studebaker's son, Mr. William Studebaker, into the 1950's. It is said that John C. Studebaker advised his sons Henry & Clement to "Always give more than you promise" when they opened the H & C Studebaker blacksmith shop on February 16, 1852. This creed was followed in affairs both business & civic, as the family's many lasting philanthropic efforts attest. "Over a Century on Wheels" celebrates Studebaker history through the artifacts & archives of the Studebaker National Museum. The collection began with Clement Studebaker's purchase of the Lafayette carriage in 1887 & is still growing in the 21st century.

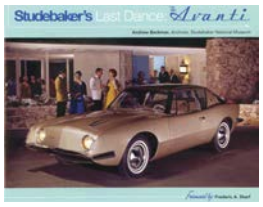
"STUDEBAKER'S LAST DANCE: THE AVANTI" BY ANDREW BECKMAN

802205 The Avanti's story is one of the automotive industry's most remarkable tales. Its debut in April of 1962 is a testament to the hard work and dedication of everyone involved with Studebaker's sports car. In the end...



...the Avanti did not save Studebaker. By 1962 it can be argued nothing could have. Still, the company's quest for salvation brought them back to the play book that made Studebaker a styling leader. Fresh, original design backed by the Raymond Loewy name. "Studebaker's Last Dance: looks at how America's oldest automobile manufacturer came to build "America's Most Advanced Automobile". 62 pages. **.....$24.95 ea.**

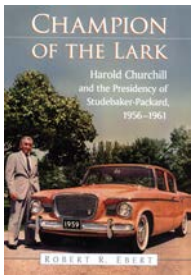
CHAMPION OF THE LARK BY ROBERT R. EBERT



802281
A career engineer at Studebaker, Harold E. Churchill became president of the recently merged Studebaker-Packard Corporation in 1956, at a time when finances were shaky and an aging product line was losing ground to the Big Three. Quickly launching a program of "realism and common sense, "he focused the company's energies on his vision for a compact economy car the Lark. This book examines Churchill's leadership using board of directors minutes, internal documents, oral histories and media reports to construct a detailed account of these crucial years in Studebaker's history.

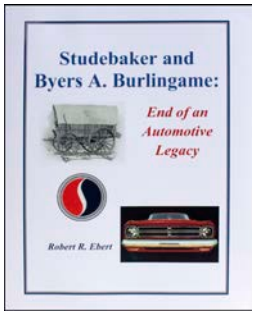
STUDEBAKER AND BYERS A. BURLINGAME: End of an Automotive Legacy BY ROBERT R. EBERT

802364 As a career finance executive at the Packard Motor Car Company and then, after the merger, at Studebaker Corporation,



Byers A. Burlingame had a firm understanding of the challenges that faced the company in 1963. Upon ascending to the presidency of Studebaker, after the forced resignation of his predecessor, Sherwood H. Egbert, Burlingame took actions that he believed were in the best interests of the shareholders of the corporation. The wisdom of Burlingame's decision to close the South Bend, Indiana Studebaker plants at the end of December 1963 and move production of Studebakers to the Hamilton, Ontario Canada assembly plant continues to be a matter for debate among Studebaker enthusiasts over a half century later. Was the move to Canada an honest attempt to save the Studebaker marque from extinction? Or was that decision simply a delaying action to resolve other problems associated with terminating Studebaker automobile production?

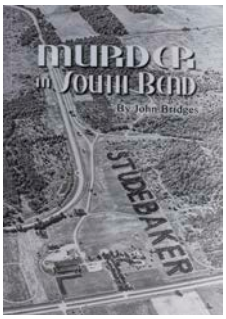
MURDER IN SOUTH BEND BY JOHN BRIDGES

802391



f only a few things had gone differently, today's car companies in America would be called the big four: General Motors, Chrysler, Ford, and Studebaker-Packard. This historical novel shows how one brilliant German automative engineer who got his start working on Germany's "peoples car" changed the course of American automative history. Late in World War II, when allied bombers almost destroyed the Volkswagen plant, Hans Werner left and joined his college roommate who was one of Dr. Werner Von Braun's rocket scientists and traveled to America with the group. Hans escaped his work site at White Sands, New Mexico, and moved across country, eventually landing a job at Studebaker in South Bend, Indiana. By helping Studebaker develop America's first practical four-passenger compact car and promoting extensive sharing of components between models, the company prospered and grew. In a power struggle with the local union, Hans was framed for the murder of his boss the vice president of Engineering. He eventually was cleared and got back to work on his compact car. The invasion of the VW Beetle never happened since Studebaker with its superior design, was at the right place at the right time with its small car. Reading this book will convince you that it really could have and should have happened.

Reprinted Chassis Parts Manuals

Give exploded views of the various parts of the car with corresponding part numbers. These exploded views show in detail the individual components of most parts on the car. Each component has a identification number. These "part numbers" can then be used when ordering parts. Using part numbers is much more accurate than merely...

...providing a description of needed parts, and cuts down on the possibility of receiving wrong parts. Most chassis manuals also include a section on model identification with beginning serial and engine numbers. Parts of the car included in the chassis manual include the engine, transmission, fuel system, exhaust, cooling system, electrical system, brakes, front and rear suspension, steering, instruments, fenders and sheet metal, frame, and rear differential.

Monographs

Compiled by Studebaker National Museum, these monographs include a wealth of information on the models they represent. Photographs are included for most models which includes many exterior, interior and engine compartment photos. These monographs answer many questions and are very useful when completing a restoration. Most of the monographs contain:

- Detailed articles on the specific models.

- *A listing of available paint color options and codes.*
- *Production totals for each year by model and body style.*
- *Specifications for all of the specified models.*
- *Distinguishing differences between the models.*
- *Factory service letters.*
- *A listing of wheel and stripe colors.*
- *Available accessories with prices.*
- *A listing of original sales and other literature for each model.*
- *Starting and ending serial and engine numbers for each year.*
- *A listing of under hood colors.*
- *A listing of upholstery fabrics and colors.*

Hardware

When ordering items from this section part numbers must be provided.

This section contains many pieces of hardware that were used on Studebaker vehicles. To use this section you MUST use the Studebaker chassis or body manuals to determine if a part is correct for your particular application. For example, if you are looking for the bolts that secure the starter on the clutch housing, you will first need to find "starters" in the electrical section of the chassis catalog. Under the listing of starters you will need to find the "Bolts" listed. You will need to identify which bolt is correct for your vehicle and note its part number. You can then look through this section to determine if the number is listed and available.

Mirrors

Rear View Mirrors

All passenger car mirrors are suitable for both left and right side mounting. NOTE: Once mounted, mirror adjustment is limited. Studebaker International Recommends that mirrors be positioned for best visibility with someone in the driver's seat before you drill the mounting holes.

Outside rear view mirrors were optional for Studebakers in most states. Right side mirrors were also optional and were rarely ordered as they were small and difficult to see from. When they were installed is was mostly for decorative purposes. Newer cars use convex glass on the right side mirror to enhance visibility. We now have all of our Studebaker mirrors available with convex glass for the right side. Even though this is not original for the purist, it will provide better visibility and make the right side mirror more functional. All have "Objects in mirror are larger than they appear" written on the surface.

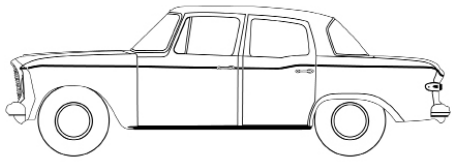
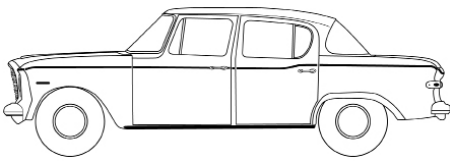
How to Identify Body Style

Long or Short Wheelbase 4-Door Sedan



"W" Body Short Wheelbase (SWB) 4-door sedan

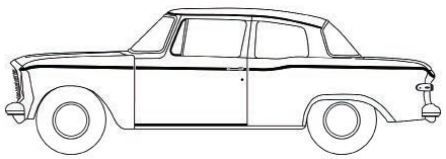


"Y" Body Long Wheelbase (LWB) 4-door sedan

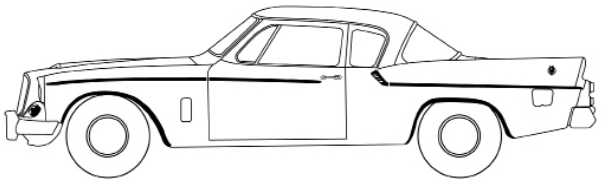
The easiest way to tell whether the vehicle is a long wheelbase (LWB) or a short wheelbase (SWB) model is that the rear door on long wheelbase sedans contain their own vent window. This vent window opens on all but a few models. From 1947-54 all long wheelbase sedans are Land Cruiser models. All other 4-door models during these years are short wheelbase sedans and are Champion or Commander models. 1955 long wheelbase sedans are called President State sedans. Short wheelbase 1955 sedans are designated as Champion, Commander, or President models. 1956-57 long wheelbase sedans are called President Classic models and all 1958 Presidents are long wheelbase sedans. 1959-60 Lark sedans are all short wheelbase except for some taxis which were long wheelbase. 1961 Cruiser models used the long wheelbase and all other 1961 Larks were short wheelbase. 1962 Larks were all long wheelbase even though some models did not have the rear vent window. 1963-66 Larks were all long wheelbase.

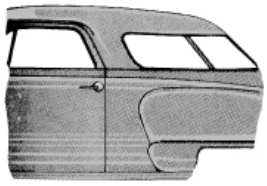
2-Door Sedan

These have a post (B-Pillar) separating the door glass from the rear quarter window glass and were available for all years.



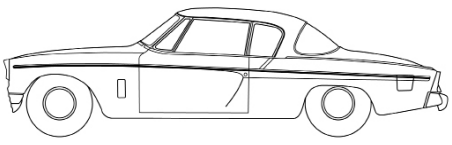
2-Door Coupe





These are similar to 2-door sedans except that the rear quarter windows do not roll down. The rear windows are either stationary or they flip outward for ventilation.

Hardtop



Having a metal roof does not mean that your car is a hardtop. The easiest way to tell if your car is a hardtop is that it is a 2-door model and that there is no post (B-Pillar) behind the front door and when both windows are rolled down, there is no pillar. The hardtop model was first introduced in 1952. From 1953-58 it was available as the "K-Body" hardtop which remained available through 1958. In 1958 an additional hardtop was available designated the "J-Body" hardtop and was available as a Studebaker Commander or President and also as a Packard. From 1959-64, the "J-Body" was the Lark. From 1962-64, the "K-Body" hardtop was again available and named Gran Turismo Hawk.

Stereo Radio

NOTE: *Now you can have top quality stereo sound in your 1958-66 Studebaker or 1963-early Avanti II without cutting the dash. Our custom designed stereo radios fit right in the dash opening, use the factory faceplate. Our front and rear stereo speakers also fit in existing speaker openings and give great stereo sound without having to cut any holes. Use your original bezel. Speakers and bezel are not included with radio.*

NOTE: *Sorry this radio will not fit 1957 and earlier model Studebaker and will fit only early Avanti II models with delco radios as original equipment.*

801180R Stereo AM/FM radio. Features include 4 AM & 12 FM presets plus manual tuning, FF-RW (locking) seek preset scan and auto store, 4-way fader, separate bass and tremble, power antenna lead, 2 foot USB cord on back of radio AUX input front and rear (Ipod etc). LCD with green lighting, 200 watts. Please specify year and model of car.

Battery Mat

800804 This battery mat offers every car around-the-clock protection from an ever-present threat: its own battery. A battery can leak undetected for months, causing rust on any metal surface the acid encounters. This rust can cause irreversible damage to body parts resulting in costly repairs or even accidents. The battery mat (which is slightly larger than a standard size battery) is inserted underneath the battery, which is then clamped down as usual. It can be installed easily at any time, either under an existing battery or when replacing an old one. Once installed, this battery mat will trap and neutralize battery acid that leaks from the terminals or top side of the battery, thus preventing corrosion and expensive damage. Because of the latex sealant, this battery mat can repel water and keep the acid neutralizers sealed in and potent. Because the latex sealant is not impervious to battery acid, however, the acid will seep into the battery mat's highly porous fabric, where it will be absorbed and harmlessly neutralized. Everyone who owns a car should install one to prevent damage from a leaking battery. It is usable in Brand "X" cars as well as Studebakers, in recreational vehicles such as motor homes and motor boats. .....**$7.00 ea.**

Oil Additive

801847 ZDDPlus avoids metal to metal wear on your engine. ZDDPlus, after 70+ years of trouble-free metal-to-metal engine protection, the EPA is forcing ZDDP (zinc dialkyl dithio phosphate + zinc and phosphorus) from domestic motor oils. If your engine was designed prior to the 1990s, the non-roller lifters require the ZDDP in the motor oil to avoid premature deterioration. Don't let the lifters run metal-to-metal. Keep ZDDP, via ZDDPlus to every 4- to 5-quart oil change. **.....$12.31 ea.**

801847X10 Case of 10 ZDDP. **.....$110.00 ea.**
